SUMMARY

Full-stack developer with 4+ years of experience delivering production web applications across the MERN and React/TypeScript ecosystem, including large-scale healthcare SaaS work at CareCloud on patient management, billing, and clinical workflow modules. Owns projects end-to-end architecture, frontend, backend, APIs, and database design and has independently run client engagements from requirements through delivery as a freelance developer. Actively building cloud and platform-engineering depth through applied coursework and client project work in Python (Django/FastAPI), AWS, Docker/CI-CD, and AI/LLM & RAG-based integrations. Comfortable coordinating technical priorities, mentoring through code review, and working cross-functionally with Product, QA, and clients.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), TanStack/React Query, Redux, Recoil, Context API, Formik, Tailwind CSS, HTML5/CSS3, Responsive & Component-Driven UI

Backend: Node.js, Express.js, Python (Django, FastAPI), RESTful API Design, System Integrations

Databases: PostgreSQL, MongoDB, Mongoose, MySQL, Firebase

Cloud & DevOps: AWS, Docker, CI/CD, Jenkins, Kubernetes

AI / LLM: AI-assisted feature development, LLM and RAG-based integrations

Tools & Practices: Git/GitHub, Nx Monorepo, Elastic UI (EUI), Postman, Jira, Slack, Agile/Scrum, Code Review, Payment & Third-Party API Integrations (Stripe)

PROFESSIONAL EXPERIENCE

Software Engineer — [MTBC \(CareCloud\)](#)

Jun 2025 – Present

- Contribute to a large-scale healthcare platform migration from a legacy ActionScript codebase to a React/TypeScript Nx monorepo, working across patient management, billing, and clinical forms modules with Node.js on the backend.
- Resolved a critical double-submit bug in patient payment and credit card flows by implementing re-entrancy guards with Formik state and React refs.
- Fixed a data-sync bug where merged patient records persisted stale UI state across the grid, sidebar, and open tabs, using targeted React Query cache invalidation.

Full Stack Developer — [MiddlemanCeo USA \(Remote\)](#)

Sep 2023 – May 2025

- Built and deployed full-stack websites from the ground up using React and Next.js for clients, owning both frontend UI and backend implementation.
- Designed responsive, conversion-focused landing pages and booking/quote-request and payment integration flows tailored to local service-based businesses.

Full Stack Developer — [TechEdge Solutions](#)

Apr 2022 – Sep 2023

- Developed responsive websites, mobile applications, landing pages, and business platforms using the MERN stack.

- Improved user experience through usability-focused development and direct stakeholder feedback; maintained consistency across products using reusable components.
- Collaborated with cross-functional teams to deliver projects within deadlines.

Open-Source Contributor — [Self-Directed](#)

Jun 2022 – Present

- Submitted pull requests addressing UI bugs, performance improvements, and API integration issues; collaborated with maintainers via GitHub Issues and code review.

SELECTED PROJECT

AllInOrOutMoving — Moving Services Marketplace

- Built a two-sided marketplace platform (MERN stack) where customers book moving jobs and service providers accept and fulfill them.
- Integrated Stripe payments with automated commission distribution between admin and service providers.
- Designed role-based dashboards and a booking management system supporting distinct customer, provider, and admin workflows.

EDUCATION & CERTIFICATIONS

- B.S. in Software Engineering Riphah International University, Islamabad (CGPA 3.44)
- Certified Full Stack Developer (Udemy) Frontend, Backend, Database Design, and Full Stack Application Architecture & Deployment
- Python backend development, cloud deployment (AWS/Docker), and AI/LLM & RAG-based integrations
